

“HEMODIALYSIS MACHINE DISINFECTANTS”

6102 CITRO™ BRA

Hemodialysis Machine Disinfectant; Citric Acid 50%

It is an invasive medical device disinfectant used for cleaning, thermochemical disinfection, decalcification, removal of inorganic and organic residues in hemodialysis devices and for preventing the risks that may occur on behalf of patients.

Ingredients

Citric acid (Lemon acid) (50%), preservative and RO water.

Features

- Outstanding disinfectant activities.
- Dissolves blood residue.
- Perfectly removes CaCO₃.
- Disinfection and decalcification in one process.
- Biodegradable, non-toxic.
- Safe for health and environment.
- Very high material compatibility.
